Phytodroitin™

100% plant-origin alternative to Chondroitin

We carefully studied the mucopolysaccharide structure of Chondroitin, and explored the significance of its composition including the role of glucuronic acid.

Phytodroitin™ is ideal for **Vegan and Vegetarian** products but also wider demographic products due to widespread concerns about the bovine origin of Chondroitin.

Phytodroitin™ is registered with the **Vegan Society and Vegetarian Society**.

Quick Facts

- UK Origin manufacturing
- 100% Plant-based derived from algae
- Mimic the mucopolysaccharide structure of Chondroitin
- Plant-based alternative to animal derived Chondroitin
- Non GMO, EtO Free, Allergen Free
